Now we want you to remember how (NAME) was two years ago and to compare it with how (he/she) is like now. Two years ago it was in 2013. I will read several situations where (NAME) has to use his/her intelligence or memory. I would like you to tell us if these have improved, stayed the same, or gotten worse in that situation in the past two years. It is very important to compare his/her present behavior with two years ago. So if two years ago (NAME) always forgot where he/she had put his/her things, and the same it is happening to him/her, then we could say that it has «not much changed».
