Here are the basics for "navigating" this survey:

- **When you finish answering all questions on a screen, click on the "Next" button. To return to an earlier screen, click the "Previous" button.**
- **If you need to break off at any point in the survey and return later, simply close your browser. Your answers will be saved, and when you login again, you will go to the place where you left off.**

[Select "Start Survey" to continue](#)

This survey is conducted by the University of Michigan as part of the Health and Retirement Study. We very much appreciate your continued participation in the HRS. We have included a number of new topics that we hope you will enjoy. We greatly value your input on all of these topics.

We understand that some of the questions in the survey are of a personal nature and want to emphasize that your responses are confidential. As always, your participation is voluntary and you may skip over any questions that you would prefer not to answer. However, please remember that your answers are extremely important to us and it helps us a great deal if you respond as completely, honestly and accurately as possible.

Thank you for your participation!

[If you come to any question that you do not want to answer, you can skip it by selecting "Next" without giving an answer.](#)

The next questions are about your living brothers and sisters. Below is a list of your siblings based on information we obtained in a previous interview. In the middle set of columns, for each person listed please indicate whether that sibling is still living, if they have died, or if the person is not a sibling of yours. Also, if the name needs correction, please type the correct name in the column on the far right.

We will collect the names of any siblings we may have missed on the next screen.

Custom Layout Question: G300_NSEXAMPLE1

In this task, on each screen you will be presented with several numbers that make up a series. There will be one or more empty boxes somewhere in the series. Sometimes the empty boxes will be at the end of the series, and sometimes they will be in the middle.

For example:

Please enter the number that belongs in the empty box.

1	2		4
---	---	--	---

Page Break

The answer we were looking for is 3, so the completed sequence is:

1	2	3	4
---	---	---	---

Page Break

Custom Layout Question: G302_NSEXAMPLE2

Below is another example.

Please enter the number that belongs in the empty box.

2	4	6	
---	---	---	----------------------

Page Break

The answer we were looking for is 8 because the numbers (2, 4, 6, 8) increase by 2. The completed sequence is:

2	4	6	8
---	---	---	---

Page Break

Instructions:

- Please enter the number that belongs in each empty box.
- An empty box could be at the end of a series or it could be in the middle.
- You may be asked a question with more than one empty box in the sequence.
- The numbers might increase, like 2, 4, 6, or decrease, like 6, 4, 2.
- Some of the problems may be easy but others may be hard. Just do the best you can.
- It is more important to answer the item correctly than to answer quickly, so take a little time to think before answering.
- In a few cases, more than one number may be correct. Please give only one answer per box. If your answer is one of the correct answers, you will receive credit.
- You can go on to the next item at any time by clicking "Next."

If you are ready to begin, please click "Next."

Each item in this task consists of a set of figures arranged in a pattern, formed according to certain rules. Look at the following patterns in example S1, to the right.

The question mark in the lower right corner of the box shows where a figure is missing in the pattern. You are to decide which of the five figures (A, B, C, D or E) under the pattern belongs where the question mark is.

Page Break

In the case of the example to the right, the figure in the bottom left is larger than the one above it but otherwise the same. In the top row, the figure at the right is the same as the one to the left of it except that it has been turned upside down. Following these rules, the missing figure should be larger than the one above it, and exactly the same size as the one to the left of it, but upside down. Therefore, E is the answer to this problem.

S1.

Page Break

In each problem, you are to decide what figure belongs where the question mark is in the pattern. To do this you have to figure out what the rule is according to which the drawings change, going from row to row, and what the rule is for the changes going from column to column. The items have different kinds of patterns and different rules by which the drawings change.

Please see the next example. Going from left to right, the circles get larger, and going from top to bottom they get darker. Therefore the answer has to be a circle which is the largest of the three sizes, and the darkest. Choices C and E are both the right size, but E is the only large circle with the correct shading. Thus E is the only drawing that fits in the pattern formed by the other circles. E is the answer that should be chosen.

What is the missing figure here? If you study the pattern you will see that going from left to right there is one more line in each figure than in the one to the left of it. Going from top to bottom, the number of lines in any figure is one less than in the figure just above it. Therefore, the missing figure should have three lines. The answer is choice C (the three lines, slanting in the proper direction).

Now we would like to ask you a few questions about recent tax changes.

In January of this year, a two-year cut in the payroll tax expired. For most households, other Federal income tax rates remain unchanged. Therefore, payroll taxes have increased by 2 percent of earnings and take home pay was decreased. The exact increase in payroll taxes and decrease in take-home pay this year depends on the amount of earnings.

For example, for someone earning \$40,000 a year, the payroll tax increase was \$800 for the year, resulting in a decrease in take-home pay of \$66 per month. Each earner in a household was subject to this tax increase.

Many people want to maintain some savings to pay for future plans or for potential needs that may arise. By savings we mean amounts held in checking and saving accounts, money market funds, stocks and bonds, including amounts held in retirement accounts such as IRAs and 401(k)s.

The next questions are about the different ways people may plan to use their savings and assets for future needs.

Page Break

Below is a list of reasons that people may have for holding savings in reserve. Please order the list beginning with the reason that is most important to you and ending with the reason that is least important. You can do this by simply clicking on the box and holding it while "dragging" it to a new position. The most important reason should be at the top and the least important reason at the bottom. When you are done, select 'Next' to continue.
